<b>Office Action Summary</b>	<b>Application No.</b> 10/711,581	<b>Applicant(s)</b> ZALEWSKI, MARCIN	
	<b>Examiner</b> Victor R. Kostak	<b>Art Unit</b> 2622	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2622

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Note MPEP 606.01.

2. Applicant is reminded of the proper content of an abstract of the disclosure.

***A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.***

Extensive mechanical and design details of apparatus should not be given.

3. The amended Abstract of 09/30/04 does not inform the reader in any way that the proposed inventive feature centers around a multiple frame buffer arrangement and its benefits.

4. The drawings are objected to because the loop arrangement shown in Fig. 6 does not include an input or output to the system.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 2622

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. Claims 2-5 are objected to because of the following informalities: applicant probably intended to end claim 2 with the word "*format*". Appropriate correction is required.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Yanai et al.

The video conversion system of Yanai (noting Figs. 1, 2, 6 or 18-22) includes a receiving stage (camera, noting Fig. 1 or 2) for receiving analog video signals in a first format (i.e. frame rate); block 11 for converting the analog video signal into digital form; a buffer controller arrangement including frame buffer memories 1-8 (selective storage assignments shown in Fig. 6), stage 15 that controls the frame decoding and displaying (of stages 14 and 13), and connected to the conversion stage 11; a video coder 13 that transforms the processed digital video data back

Art Unit: 2622

into analog data; a receiver stage (display) for presenting the signal in a second different format (e.g. frame rate converted format); the stages are connected to and controlled by a CPU 18.

As for claim 2, at least three buffers can be arranged (noting again Fig. 6).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Claims 3-7 appear allowable over the prior art.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday - Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
